---

Jim, Bob and Rick

EPA's cover letter and comments on the Round 2 Comprehensive Site Characterization Summary Report are attached. As noted in the cover letter, these comments focus on Sections 1-9 and most of the appendices. We have included our expected schedule for providing a screening level risk assessment, problem formulation for ecological risk and additional comments on Section 10 and 11, and Appendix E (Food Web and BSAF development) and G (TRVs). Although the comments are extensive, as noted in the letter we think most of the key issues in our comments have been discussed and/or raised in some of our previous comments.

We look forward to discussing the process for addressing these comments at our managers meeting on Thursday. In the meantime, please let us know if you have any comments or questions.

Chip
